Open System Preferences and choose the Print & Scan icon, next to last item in the second row.
Click on the plus sign (+) below the left column in the Print and Scan dialogue
Choose the IP icon in the top menu bar, and select "HP Jetdirect - Socket" from the Protocol drop-down menu.

Enter the IP address of the printer in the "Address" field and wait for your computer to find the appropriate driver.

It will be shown in the "Print Using" field.

Enter a name to help you identify the printer in the "Name" field. The "Location" field is optional. Click the "Add" button.
