Projector Issues

Make sure the Adapter is plugged into your Mac and the Projector VGA cable is plugged into the Adapter. These connections need to be connected firmly.
Make sure the projector is powered on and podium is set up to use the Laptop selection.

**Advanced Troubleshooting**

Go to System Preferences on your Laptop
Open Displays
On VGA Display make sure in the Arrangement tab “Mirror Display” is checked.

In VGA Display in the Display tab make sure the resolution is set to 800 x 600
